

# SIL-ACT™ PROFESSIONAL SPRAYING SYSTEM

**ADVANCED  
CHEMICAL  
TECHNOLOGIES, Inc.**  
*"Protecting the World's Infrastructure"*

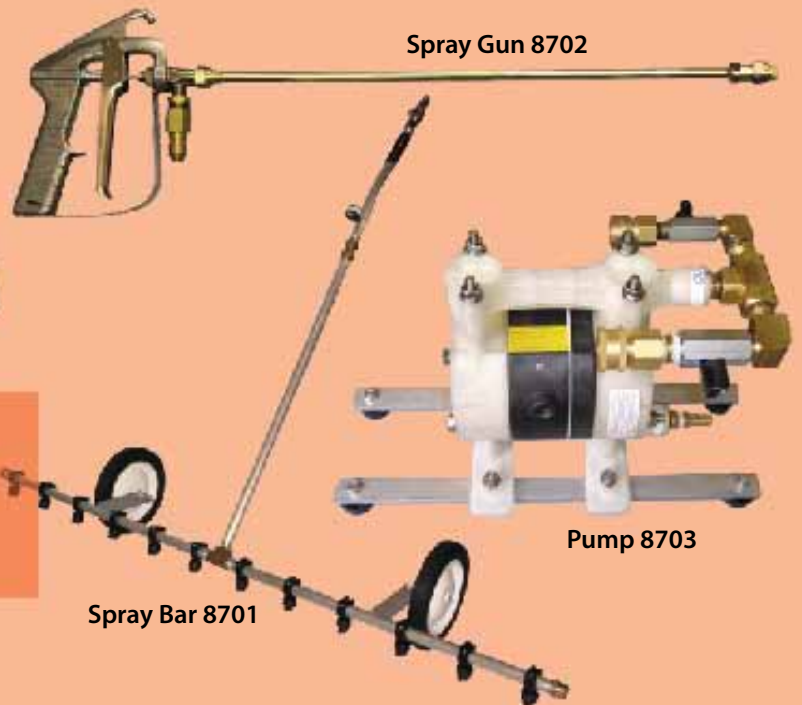

The Model 8700 Sprayer Kit is designed to treat large areas quickly and accurately. The sprayer consists of an air operated pump which draws the SIL-ACT™ Silane Solution directly from the shipping container, as 6 foot spray bar for covering large surfaces and a spray gun to apply the fluid to curbs or vertical surfaces. The spray bar and spray gun attach to the pump with quick disconnects for fast assembly. It is all packed in a sturdy plastic case for easy storage and hauling. To extend the life of your equipment it is recommended that the pump lines, spray bar and spray gun be flushed with SIL-ACT™ Equipment Cleaner after use.

Kit 8700
